EDUCATION

•Bachelor of Science in Computer Science

Aug 2021 – Jun 2025

Northbridge Institute of Technology

CGPA: 3.85/4.00

- Relevant coursework: Data Structures & Algorithms, Machine Learning, Distributed Systems, Network & Application Security, Cloud Computing.
- Teaching Assistant for Introduction to Artificial Intelligence, mentoring 40+ undergraduate students across 2 semesters.

PROFESSIONAL EXPERIENCE

•Software Engineer

Jun 2025 – Present

NexaCloud Systems

- Designed and shipped a Retrieval-Augmented Generation (RAG) internal search assistant on top of an LLM API, cutting average support-ticket resolution time by 35% for a team of 50+ agents.
- Migrated a monolithic backend into 6 Go microservices handling 2M+ requests/day, reducing p95 latency from 480ms to 140ms.
- Introduced automated security scanning (SAST/DAST) into the CI/CD pipeline, cutting critical vulnerabilities reaching production by 90% over two quarters.
- Led migration to Kubernetes on AWS EKS, improving deployment frequency from weekly to 15+ times per week and reducing infrastructure costs by 22%.

•Software Engineering Intern – AI & Security

Jan 2025 – May 2025

Sentinel Labs

- Built a machine-learning anomaly-detection model (scikit-learn) on network traffic logs, achieving 96% precision in flagging suspicious activity and cutting false positives by 40%.
- Conducted internal penetration tests across 8 web applications, identifying and remediating 27 vulnerabilities including 4 rated critical under OWASP Top 10.
- Automated recurring vulnerability scans with Python and OWASP ZAP, reducing manual security audit time from 3 days to 4 hours per release cycle.

PROJECTS

•AI Resume Screening Platform

Feb – Apr 2025

Personal Project

- Built an end-to-end resume screening tool using a fine-tuned LLM and vector search (LangChain + Pinecone) to rank candidates against job descriptions.
- Processed 10,000+ resumes in evaluation testing, cutting manual screening time by 70% while maintaining 92% agreement with human reviewers.
- Deployed as a FastAPI service on AWS with Docker, serving predictions with average latency under 300ms.

•Automated Vulnerability Scanner

Oct – Dec 2024

Personal Project

- Developed a Python-based scanner that chains Nmap, OWASP ZAP, and custom checks to detect OWASP Top 10 vulnerabilities across web applications.
- Generated automated remediation reports, reducing manual security audit time by 80% across 15+ test applications.
- Open-sourced the tool on GitHub, reaching 300+ stars and 20+ community contributors.

•Real-Time Distributed Chat Platform

Jun – Aug 2024

Personal Project

- Architected a horizontally-scalable chat backend (Go + Redis Pub/Sub + WebSockets) supporting 50,000+ concurrent connections in load testing.
- Implemented end-to-end message encryption and rate limiting, preventing abuse without impacting message delivery latency (under 50ms p99).

VOLUNTEERING & ORGANIZATIONAL EXPERIENCE

•Cybersecurity Workshop Lead

Feb – Jun 2024

Campus Computing Society

- Designed and delivered a 6-session ethical hacking workshop series, training 60+ students on network scanning, web exploitation, and CTF fundamentals.
- Organized an internal Capture-the-Flag competition with 15 teams, building 8 custom challenges spanning web, crypto, and reverse engineering.

•Backend Engineer & Team Lead

Jun – Aug 2024

Student Tech Fair 2024

- Led a team of 6 to build the event registration and ticketing platform, handling 3,000+ attendee sign-ups with zero downtime.
- Implemented a CI/CD pipeline with GitHub Actions, cutting deployment time from 45 minutes to under 5 minutes.

TECHNICAL SKILLS

- **Languages**: Python, Java, C++, JavaScript/TypeScript, Go
- **AI / Machine Learning**: PyTorch, TensorFlow, scikit-learn, LangChain, Hugging Face Transformers
- **Web & Backend**: React, Next.js, Node.js/Express, Django, FastAPI, Spring Boot
- **Databases / Cloud**: PostgreSQL, MongoDB, Redis, AWS, GCP, Docker, Kubernetes
- **Security**: Burp Suite, Nmap, Metasploit, OWASP ZAP, Wireshark
- **Tooling**: Git, GitHub Actions, Jenkins, Terraform, Linux

ACHIEVEMENTS

- 1st Place, National Collegiate CTF** — 1st among 120 teams, 24-hour capture-the-flag *Mar 2025*
- AWS Certified Solutions Architect – Associate** — cloud architecture certification *Jan 2025*
- Certified Ethical Hacker (CEH)** — penetration testing certification *Sep 2024*
- Dean’s List** — top 5% academic performance, 4 semesters *2022 – 2024*
